SUMMARY

Full-Stack Software Developer with a background spanning education, entrepreneurship, and product development. Recently completed an intensive Full-Stack Software Engineering program with hands-on experience building web applications using C#, .NET, SQL Server, JavaScript, HTML, and CSS. Founder of a successful custom footwear brand and developer of a full-stack e-commerce platform supporting business operations and customer transactions. Brings over a decade of experience solving complex problems, communicating with diverse stakeholders, and delivering high-quality solutions. Passionate about leveraging technology, creativity, and continuous learning to build impactful software products and contribute value across teams and organizations.

EDUCATION

TrueCoders

Full-Stack Software Engineering Program

Coastal Carolina University

Bachelor of Arts in Education

EXPERIENCE

Founder & Product Owner

December 2017 – Present

Ink Your Shoes

Virginia Beach, VA

- Founded and scaled a custom footwear brand, overseeing product development, customer acquisition, business operations, and strategic planning.
- Generated over \$65,000 in revenue through direct-to-consumer sales and custom product offerings.
- Gathered customer requirements and translated feedback into product improvements and operational enhancements.
- Managed relationships with corporate clients and public figures, delivering customized products while maintaining quality and timeline expectations.
- Utilized data and customer insights to drive business decisions and improve overall performance.

Educator

August 2015 – Present

Virginia Beach City Public Schools

Virginia Beach, VA

- Developed and delivered structured learning experiences for diverse groups while adapting instruction based on performance data and evolving requirements.
- Applied analytical problem-solving to identify learning gaps, implement targeted solutions, and improve student outcomes.
- Collaborated with multidisciplinary teams to support educational initiatives and technology integration efforts.
- Built strong communication, organization, and stakeholder management skills through daily interaction with students, families, and colleagues.

Paraeducator

The Academy for the Advancement of Children with Autism

- Supported individualized learning plans and behavioral interventions while collaborating closely with educational teams and specialists.
- Developed strong adaptability, communication, and problem-solving skills in a dynamic educational environment.

PROJECTS

InkYours E-Commerce Platform | Founder & Developer

- Designed, developed, and deployed a full-stack e-commerce application using C#, ASP.NET, SQL Server, JavaScript, HTML, CSS, and Bootstrap.
- Architected and implemented a relational database to manage customer accounts, inventory, orders, and transaction records.
- Built responsive user interfaces and streamlined business workflows to improve operational efficiency and customer experience.
- Integrated Git and GitHub version control workflows to support iterative development and code management.
- Applied software engineering principles including object-oriented design, database normalization, and scalable application architecture.

TECHNICAL SKILLS

Languages: C#, SQL, JavaScript, HTML5, CSS3

Frameworks & Libraries: .NET Core, ASP.NET MVC, Entity Framework, Bootstrap

Databases: Microsoft SQL Server

Tools & Technologies: Git, GitHub, Visual Studio, JetBrains Rider, SSMS, REST APIs

Concepts: Object-Oriented Programming (OOP), Relational Database Design, Software Development Life Cycle (SDLC), Agile Methodologies, CRUD Operations, Full-Stack Development
